Dear CSE Students:

Welcome to the second newsletter of the Summer 2018 semester.

Message from the UG Advisor: Please be aware of the following important dates. Summer term A ends on Friday, June 22nd. Summer term B begins on Monday, June 25th. Summer C ends on Friday, July 20th. The fall term will begin on Monday, August 20th. Also, please note that if you plan to visit us during walk-in advising hours this summer, you may want to confirm that we will be in the office. We are frequently away from the office due to orientation activities. IMPORTANT: The CSE office will be closed on Friday, August 17th. As always, contact us if you have any questions.

Message from the Grad Program Assistant: You can begin submitting your Graduation Checklists for summer! Please see me in ENB 342D if you need assistance. In addition, do not forget to apply for graduation via OASIS. Please make sure that you are working on your Fall 2018 schedule. Keep in mind that we have new students beginning in Fall, therefore, please do not register for more courses than what you need. This will allow new students to register without having to be added to the waitlist. If you are a PhD student and have successfully passed the Qualifying exam and have completed your Major Area Research Paper defense, you can now submit your Admission to Doctoral Candidacy form. The deadline is August 3!

Attached are announcements for the following (please note that this listing does not imply University or Department endorsement):

- CARRT Research Assistant Position Open
- USF Department of Computer Science and Engineering afterCollege Network
- College of Marine Science USF St. Pete Campus Summer Internship Opportunity
- Business Today’s 44th International Conference Expenses Paid For: Apply by June 30th
- National Geospatial Intelligence Agency (NGA) Summer 2019 Internship Program
- Custom Manufacturing & Engineering IT Intern (Part-time, flexible, 10-20 hrs/week)
- Jabil IT Auditor Full-time Position
- Tech USA Software Engineer in Support Full-time Position

Regards,

Ken Christensen
Professor and Associate Chair of UG Affairs
Research Assistant Position Open

CARRT is looking for a senior undergraduate or a graduate student who can work on the Virtual Reality for Vocational Rehabilitation (VR4VR) project. The student will be working on the development and programming of virtual reality modules for the project, and will be recruiting and testing subjects with cognitive disabilities (Autism, TBI, etc.) on the modules that are already developed. The student will need to commit to work on this project a minimum of 20 hours a week for one year. A generous stipend will be provided based on the applicant’s credentials. Tuition waiver will be provided if the applicant is a graduate student. The qualifications needed for this position are as follows:

**Technical Qualifications:**
- Experienced with Unity game engine and C#
- Experienced with virtual reality applications and development
- Experienced with mobile application development (Android and iOS)
- Strong 3D math skills (linear algebra, vector math)
- Knowledge of database tools such as mySQL
- Familiarity with Maya, 3D Max and likewise modeling and animation tools

**Personal Characteristics:**
- Good analytical and problem solving skills
- Quick learning
- Ability to adapt to changing processes
- Well organized
- Friendly and patient character to work with persons with cognitive disabilities
- Can work with and collaborate with others
- Can pay attention to details

If you feel that you are qualified for the position, please email your resume to: Dr. Redwan Alqasemi: alqasemi@usf.edu

Hello! My name is Ilene E and I am a student at Princeton University and am the Director of Design and Marketing for Business Today’s 44th International Conference. Business Today is a 501(c)3 nonprofit organization founded by Steve Forbes in 1968. For the past 50 years, our goal has been to bridge the gap between influential business leaders, from all industries, and top undergraduate students from across the world. BT creates a dynamic forum in which students from all backgrounds can be educated and inspired. This year’s International Conference, Business Today’s flagship event, will take place on November 18-20th, 2018, at the Grand Hyatt in New York. The event is a three-day business conference with 150 undergraduate students interacting with over 70 executives from Fortune 500 companies.

This year, we are piloting a writing competition, in which students simply submit an editorial in lieu of GPA, resume, multiple essays, and etc. Multiple entries are also allowed; the top winner will win a spot at the IC while the top three essays will be published in our flagship magazine. We also offer the Impact Challenge, in which teams can apply with their social entrepreneurship startup. The top five finalists will attend the conference; the winner receives $15k seed funding.

As you are an influential member of your community, we hope you will share this opportunity (email copy below) with your community and encourage them to apply.

Students will not be penalized for whichever method (general application, writing competition, impact challenge) they choose, but we recommend the writing competition for those who do not wish to submit their GPA or a resume. Nonetheless, we still require applicants to 1) be undergraduates in fall 2018 and 2) able to attend all three days of the conference.

The second round deadline is June 30th, 11:59 PM EST. Students can apply here. Please feel free to reach out to me with any questions, or visit our website for more details. Thank you so much for your time!

Hello,

Business Today is a 501(c)3 nonprofit organization founded by Steve Forbes in 1968. For the past 50 years, our goal has been to bridge the gap between influential business leaders from all industries and top undergraduate students from across the world. BT creates a dynamic forum in which students from all backgrounds can be educated and inspired.

Business Today’s flagship event, the 44th International Conference, will take place Nov 18 - 20th, 2018 at the Grand Hyatt in New York. As an all-expenses paid, 3-day business conference, it includes:
• 150 undergraduate students, 75 executives
• Past keynotes:
  o Gerald Ford (38th President of the United States)
  o Jeff Immelt (CEO of GE)
  o Wendy Kopp (Founder of Teach for America)
  o Muhtar Kent (CEO of Coca-Cola)
• Executive seminars (on-site and off-site)
• Visits to company headquarters in NYC
• Recruiting Reception
• Dinner at Bryant Park Grill
• Impact Challenge (top five finalists attend the conference to pitch their social entrepreneurship startup; winning team receives seed funding of $15k)

Apply now through our general application, Writing Competition (no resume or GPA required, multiple entries allowed), or Impact Challenge. The second round deadline is June 30th, 11:59 PM EST.
National Geospatial-Intelligence Agency (NGA)
Student Internship Program – Summer 2019

At NGA, we are looking for eligible, top-performing students from your academic institution for our paid internship program.

Eligibility Requirements:

- U.S. Citizenship
- 18 years of age or older
- Ability to obtain a top secret clearance
- Cumulative GPA of 3.0 or higher

The 2019 Student Internship Application is open until September 30th, 2018.

Apply: www.intelligencecareers.gov/NGA

Once deemed eligible, students are invited by email to complete a virtual interview. During the interview you will be asked to upload the following documents:

- Unofficial Transcript
Information Technology (IT) Intern – Summer

JOB DESCRIPTION
Job ID#: 2017-002
Title: Information Technology (IT) Intern - Summer 2017
Company: Custom Manufacturing & Engineering, Inc. (CME)
Location: Pinellas Park, FL 33781
Regular/Temp: Temporary Employee
Full-Time/Part-Time: Part Time Internship
Submit Reply and Resume to: CMEHR@custom-mfg-eng.com

Job Summary: We have an exciting opportunity for a student to perform as an Information Technology (IT) Intern reporting to the Director of IT/Facilities. An award winning Tampa Bay small business for two decades, CME delivers engineering, manufacturing, test, and calibration/repair services to Government and Industry. Join us at CME, where “We Love to Design & Build!” CME’s culture is embodied by Core Values that are focused on: Serving the customer while protecting CME, delivering quality products and services as required, solving problems, working with energy and passion, and encouraging and developing employees that challenge themselves. Also a strong supporter of Science, Technology, Engineering and Math (STEM) and other select charitable initiatives, CME promotes and encourages employee community support to nonprofit organizations or educational institutions, especially for mentoring and school/student support. Most of CME’s products and services are focused on the development and manufacturing of energy efficient and sustainable products such as more efficient power supplies, intelligent power distribution units, energy saving solar panels, and other electronic systems, end products, or components. (www.custom-mfg-eng.com).

Under direct supervision, successfully chosen candidate will assist in many aspects of our Information Technology (IT) operations and support to the business and will provide IT department technical assistance for the support of PC users, hardware and software installation, and IT related projects and tasks (e.g., install and setup hardware including computers and printers; conduct hardware and software asset inventory; assist with implementation and integration of new technologies), and perform other related duties as may be assigned.

DUTIES AND RESPONSIBILITIES

• Under limited supervision, work on non-routine projects with general instruction and advanced projects with detailed instructions
• Assist in the completion of non-routine and advanced tasks. Participate in the day to day activities of assigned functional area assisting in the completion of non-routine and advanced tasks
• Assist in applying knowledge to analyze, investigate and resolve non-routine problems
• Install and configure desktop computer hardware and software
• Troubleshoot computer hardware, software, and printing issues and install and perform updates/minor repairs to hardware, software, or peripheral equipment, following design or installation specifications
• Assist in the implementation, inventory, and management of IT assets
• Assist in various IT related projects for team and maintain records of daily data communication transactions, problems and remedial actions taken, or installation activities
• Assist in developing electronic and hard copy reports, records, diagrams and charts, when necessary
• Responsible for observing all laws, regulations and other applicable obligations wherever and whenever business is conducted on behalf of the Company. Expected to work in a safe manner in accordance with established operating procedures and practices
• Other duties as assigned or required.

**Job Qualifications:**

• Typically requires enrollment as an undergraduate or graduate student at a recognized college or university.
• Basic understanding of Information Technology (e.g., computer networking, Windows OS, and Microsoft Office, MacOS, etc.).
• Ability to configure and troubleshoot computer hardware, software, and printers.
• Ability to learn new applications and technologies.
• Ability to lift and move equipment weighing up to 40lbs for short distances.
• Must possess:
  • The ability to understand new concepts and apply them accurately
  • The ability to follow general and detailed instructions as well as organizational policies and procedures
  • Good communication and interpersonal skills to enable effective interface with internal professionals
  • The ability to work independently or in a team environment
  • Basic computer skills.

**MINIMUM REQUIREMENTS NEEDED:**

• 0-2 years of experience
• Work schedule projected to be 10 to 20 hours per week and flexible to class scheduling
• Positions with CME require access to controlled goods and technologies subject to the International Traffic in Arms Regulations or the Export Administration Regulations. Applicants for these positions need to be "U.S. Persons," as defined in these regulations. Generally, a "U.S. Person" is a U.S. citizen, lawful permanent resident, or an individual who has been admitted as a refugee or granted asylum.

**Travel Percentage Required:** None expected. 0% - 5%

CME develops, prototypes, and manufactures custom-engineered and build-to-print products, assemblies, and subassemblies for industry and government customers. As a growing Tampa Bay engineering and manufacturing small business, our team works with aerospace and defense organizations and other industries all over to develop and produce quality products to meet our customers’ unique requirements. CME’s products are used by the US military and industry around the world.

CME is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, pregnancy, sexual orientation, gender identity, national origin, age, protected veteran status, or disability status.

**Removal Date:** 08-Jul-2017
IT Auditor

Job Summary
The IT Auditor I will coordinate, budget, and execute audit plans designed to identify risk, to mitigate loss, and to protect the people, assets, and cash flow of the company.

Essential Duties & Responsibilities
• Assists in planning and conducting complex IT audit projects, including the preparation of an objective risk-based assessment and an effective audit approach.
• Serve as a technical advisor to financial/operational auditors on IT aspects of functions and activities reviewed.
• Evaluate the adequacy of internal control and develop creative and realistic recommendations that add value to the organization.
• Audits the activities of various IT departments for compliance with plans, policies, and procedures prescribed by management.
• Audits the IT operations of various departments, divisions, and locations of the organization in order to verify general computing controls are designed and operating effectively.
• Determines proper technical and security configuration of technical systems and operations in infrastructure and IT.
• Prepare and submit reports on the results of audits. These reports should be clear, concise and insightful to provide IT and the business practical solutions.
• Develop and maintain an appropriate level of understanding of current technologies and IT best practices to help in the completion of assignments.
• Assignments are broad in nature and usually require originality and ingenuity.
• Thorough understanding of general business and IT operations and processes.

Education & Experience Requirements
• Bachelor's Degree required preferably in Information Technology, Accounting, Finance, Business Administration, or related field.
• 0-2 years of related work experience related to audit, accounting, finance and operations.
• CISA, CPA, CIA, CISSP preferred.
• Knowledge and experience in Information Technology, particularly distributed computing technologies, IT security, system development, computer operations, business continuity management, application software, telecommunications, disaster recovery and risk assessment.
• SOX Internal Control testing and general IT General control knowledge

Jabil is an equal opportunity employer and considers qualified applicants for employment without regard to race, color, creed, religion, national origin, sex, sexual orientation, gender identity, age, disability, veteran status, or any other status protected by law.

Job Req Id: 213234
