UNIVERSITY OF SOUTH FLORIDA

Major Research Area Paper Presentation

Rodent Spatial Cognition Abilities and Computational Models

by

Martin Llofriu

For the Ph.D. degree in Computer Science & Engineering

A strong focus has been devoted to the study of the rodent navigation system. Inspired on these studies, many computational models have been proposed. This work reviews the main experiments that elucidated rodents’ navigation abilities, the involved physiological structures and the existing computational models of rodent navigation.

THE PUBLIC IS INVITED

Examining Committee
Alfredo Weitzenfeld, Ph.D., Major Professor
Yu Sun, Ph.D.
David Diamond, Ph.D.
Miguel Labrador, Ph.D.
Wilfrido Moreno, Ph.D.

Srinivas Katkoori, Ph.D.
Graduate Program Director
Computer Science and Engineering
College of Engineering

Rafael Perez, Ph.D., Interim Chair
Computer Science and Engineering
College of Engineering
