

Gary S. May, Ph.D.  
Professor and Dean  
Georgia Institute of Technology

Phone: 404-894-6825  
College of Engineering, Georgia Tech, Atlanta, GA 30332  
E-mail: gary.may@coe.gatech.edu

Dr. Gary S. May is the Dean of the College of Engineering and Professor of Electrical and Computer Engineering at the Georgia Institute of Technology. In that capacity, he serves as the chief academic officer of the college and provides leadership to over 400 faculty members and to more than 13,000 students. The College of Engineering at Georgia Tech is the largest producer of engineering graduates in the United States. In the most recent rankings by *U.S. News & World Report*, Georgia Tech's engineering program ranked fourth.

Prior to his current appointment, Dr. May was the Steve W. Chaddick School Chair of the School of Electrical and Computer Engineering at Georgia Tech. At the conclusion of his leadership in 2011, graduate programs in electrical engineering and computer engineering each ranked sixth, the computer engineering undergraduate program also ranked sixth, and the electrical engineering undergraduate program ranked fifth. All of these rankings represented the highest in the history of the School up to that point.

Dr. May's field of research is computer-aided manufacturing of integrated circuits. He has authored over 200 technical publications, contributed to 15 books, and holds a patent on that topic. He has also participated in the acquisition of over \$49 million in research funding, and he has graduated 20 Ph.D. students. In 1993, Dr. May was named Georgia Tech's Outstanding Young Alumnus, and in 1999, he received Georgia Tech's Outstanding Service Award. Dr. May has won two international Best Paper awards from *IEEE Transactions on Semiconductor Manufacturing* (1998 and 2000). In 2004, Dr. May received Georgia Tech's Outstanding Undergraduate Research Mentor Award, as well as the Outstanding Minority Engineer Award from the American Society of Engineering Education. In 2006, he received the Mentor Award from the American Association for the Advancement of Science (AAAS). In 2010, he was named the Outstanding Electrical Engineering Alumnus of the University of California at Berkeley. Dr. May is a Fellow of the AAAS and the IEEE.

Dr. May created the Summer Undergraduate Research in Engineering/Science (SURE) program, for which he has been granted \$3M from the National Science Foundation (NSF). SURE annually hosts minority students to perform research at Georgia Tech in the hopes that they will pursue a graduate degree. More than 73% of SURE participants enroll in graduate school. Dr. May was also the co-creator/co-director of the Facilitating Academic Careers in Engineering and Science (FACES) and University Center of Exemplary Mentoring (UCEM) programs, for which he has been granted over \$17M from NSF and the Sloan Foundation to increase the number of underrepresented Ph.D. recipients produced by Georgia Tech. Over the duration of FACES, 433 minority students have received Ph.D. degrees in science or engineering at Georgia Tech – the most in such fields in the nation. As a result of these efforts, Dr. May received the Presidential Award for Excellence in Science, Mathematics and Engineering Mentoring from President Barack Obama in 2015.

Dr. May is a member of the Board of Directors of Leidos, Inc., as well as Executive Vice President of the National GEM Consortium and a member of the National Advisory Board of the National Society of Black Engineers.

Dr. May received his B.S. in electrical engineering from Georgia Tech in 1985 and the M.S. and Ph.D. degrees in electrical engineering and computer science from the University of California at Berkeley in 1988 and 1991, respectively.

Dr. May, a native of St. Louis, Missouri, is married to LeShelle R. May. They have two daughters, Simone and Jordan (ages 20 and 18, respectively).
