Bachelor of Science in Nursing/VCARE

V-CARE is a Bachelor of Science in Nursing sequence created for service members and veterans who have completed training as Army or Air Force medics and Navy corpsmen. V-CARE is a student-centered program tailored to each veteran, acknowledging and recognizing the training and experience that each student brings. V-CARE shortens the time to degree completion while maintaining the academic rigor, clinical quality, and high NCLEX pass rates for which USF College of Nursing is known.
