

What should be included in the HITS chemical inventory?

Include

Original stock bottles containing:

- Flammable/combustible liquids and solids
- Solid and liquid oxidizers
- Organic peroxides
- Corrosives
- Toxic liquids and solids
- Compressed gases and liquefied gases
- Biological toxins
- Tax-free ethanol
- Dyes/stains

Any of the above items that have been completely transferred to new containers.

Do Not Include

- Retail products available for household use (ie. household bleach, WD-40)
- Working chemical solutions
- Sample preparations/kits
- Synthesized products
- Growth media/agar
- Prescription pharmaceuticals
- Calibration standards
- Buffer solutions
- Dessicants (ie. Dri-Rite®)
- Radionuclides
- Biological agents
