PUBLISHED ARTICLES, EDITED VOLUMES, BOOK CHAPTERS/SEGMENTS, ABSTRACTS

Note: The conventions for authorship of publications are as follows. The first author wrote most of the manuscript followed by a decrease in contributions of each subsequent co-author to the research presented in the paper, book chapter/segment. The last author may be the most senior individual who provided a major intellectual contribution to the project and/or financial support. For edited volumes, this first author took the leading role in putting together the manuscript (i.e., identifying the topic or theme, working with publisher, identifying contributors, managing the review process, review, and approval of proofs, and writing the introduction).
