University of Melbourne, training delivered in Oslo, Norway
Description of training: 16 hour training and certification program for Tuning into Teens
- 2021 **Enriching Communication Skills for Health Professionals in Oncofertility (“ECHO”) Training Program**
Moffit Cancer Center
National Cancer Institute
New York University Langone Health
Description of training: Weekly course meetings over three months, with required learner participation and course assignments, designed to educate learners about onco-fertility, facilitate learners’ ability to discuss onco-fertility issues with patients, and begin building a comprehensive onco-fertility program within the learner’s respective institution
- 2021 **Online Instructor Certification**
University of South Florida
Description of training: One month, 16 hour course, with required learner participation and course assignments, designed to enhance course instructors’ online instruction and student engagement

Leadership and Program Development

- 2013 **Curriculum Developer and Clinician**
Children's Health-Children's Medical Center, Dallas, Texas
Developed child and adolescent sibling support group curriculums for siblings of pediatric cancer patients. Curriculum was based on evidence of risk and protective factors for siblings in pediatric oncology. The structured group curriculum remains available to the Children's Health community in Dallas, Texas.

- 2013-2017 **Chair of Anti-Bullying Committee**
Children's Health-Children's Medical Center, Dallas, Texas
Chair for institutional anti-bullying committee, which included creating and disseminating resources, educational tools, and patient handouts across multiple sites, establishing and maintaining relationships with outside institutions (e.g., Dallas Independent School District), and offering continuing education workshops on managing bullying in schools (presented in-institution and in school districts around the Dall/Fort Worth Metroplex.
No percent effort funded
- 2014 **Psychosocial Team Member and Consultant**
Children's Health-Children's Medical Center, Dallas, Texas
Helped establish an adolescent and young adult comprehensive oncology program at Children's Health-Children's Medical Center. Program includes additional services and resources for adolescent and young adult patients (e.g., meeting with reproductive health professional). Program now attracts patients with newly diagnosed pediatric cancers from 14 to 35 years of age. Because adults with pediatric cancers demonstrate better survival rates and fewer treatment complications when treated on pediatric treatment protocols, the impact of the Adolescent and Young Adult clinic is expected to be lengthening and improving lives for these patients.
No percent effort funded
- 2015 **Curriculum Developer and Clinician**
Children's Health-Children's Medical Center, Dallas, Texas
Developed and implemented parent support group for parents who have a child with neuroblastoma. Based on extant data, the support group includes modules designed to improve behavior management, to enhance marital relationships, and to enhance parental self-care. This group curriculum remains available to the Children's Health community in Dallas, Texas.
