Florida Policy Survey

Summary: Researchers at the University of South Florida, in collaboration with researchers from Florida International University, conducted a statewide survey of 600 Floridians to measure public opinion on several current policy issues. The results presented in this report address the recent Supreme Court ruling on abortion, gun violence/reform, and presidential/gubernatorial job approval. The survey included a representative sample of Floridians, fielded between July 2nd and July 10th, 2022. Topline results are reported below with a confidence level of 95% and a margin of error +/- 4.

A majority of Floridians disapprove of the Supreme Court’s recent decision to overturn *Roe v. Wade*, but there is little agreement about what Florida should do next when it comes to abortion policy. A majority of respondents (57%) indicated that they disagree with the recent Supreme Court decision on abortion, with 44% saying that they “strongly disapprove”. However, when asked what the state of Florida should do following the decision, respondents were relatively split.

- Roughly a third (33%) say that the state should pass a law protecting abortion access;
- In contrast, 44% favor some state level restrictions, including...
 - A “no exceptions” ban on abortion (9%);
 - A statewide abortion ban, with exceptions for rape, incest, and mother’s health (21%);
 - Restrictions on abortion access after 15 weeks of pregnancy (15%).
- Another 13% said that the state should do nothing and leave abortion laws as they are, while 8% were “unsure”.

Abortion continues to be a partisan issue, but Democrats and Republicans see some common ground on support for pregnant mothers and adoption. A majority of Republicans (63%) in Florida approve of the recent Supreme Court decision overturning *Roe v. Wade*. In contrast, only 10% of Democrats and 24% of Independents say the same. However, a majority in all three groups are in favor of increased federal funding to support pregnant women (68% overall), sex education (71%), and child adoption efforts (80%)

Jobs and the economy are the most important issue for a plurality of Floridians. More than a third of respondents identified the economy and jobs as the most important issues facing the state today (35%). Government corruption was the second most frequently identified issues (13%), followed by healthcare (9%) and immigration (9%). The COVID-19 pandemic was identified as the most important issue by only 7% of Floridians.

Despite high profile social policy debates, midterm voters are focused on financial concerns. When asked which will have the MOST impact on their votes this Fall, a large majority (74%) of likely voters chose “pocketbook issues”, such as jobs, inflation, and the economy. In contrast, only 26% said that their votes would be more heavily influenced by social policy issues (such as abortion, equity, and LGBTQ rights). When asked to identify the three issues that will most heavily influence their voting decisions, Floridians chose inflation (48%), the economy/jobs (47%), and gun violence/crime (35%).

Most Floridians approve of the recent bipartisan gun reforms passed by Congress, and there is broad bipartisan support for more extensive gun policy reforms. A majority of respondents (59%) say that they support the recent gun reforms passed by Congress. Additionally, in the wake of several high-profile mass shootings, a bipartisan coalition of Floridians support a range of potential gun reforms, including...

- Requiring universal background checks for all gun purchases (Democrats 96%, Independents 91%, Republicans 91%);
- Requiring a license to purchase guns classified as “assault weapons” (Democrats (95%, Independents 84%, Republicans 79%);
- Prohibiting individuals under 21 years of age from purchasing “assault weapons” (Democrats 95%, Independents 89%, Republicans 81%)
- Requiring a mandatory waiting period for all gun purchases (Democrats 96%, Independents 85%, Republicans 79%)

A plurality of Floridians approve of the job being done by Governor DeSantis on “jobs and the economy”, despite partisan splits on many issues. Half of Floridians either “strongly” or “somewhat approve” of the job being done by Governor DeSantis when it comes to jobs and the economy (50%), while a plurality also supported his efforts around conservation (44%). Governor DeSantis received his lowest public support when it came to climate change, with only 42% of Floridians approving of his job in that area. While the Governor’s overall approval ratings have remained strong, there has been a slight decline in support from highs observed in [our April 2022 poll](#).

Consistent with national polls, President Biden’s approval rating among Floridians has continued to decline. President Biden’s approval among Florida voters continued to slip (compared to [our April 2022 survey](#)). A majority of respondents now “disapprove” of the job being done by the President in all areas. 63% disapprove of the job being done by the President on immigration and border security, while 62% disapprove of the President’s performance when it comes to jobs and the economy.

Survey Information

600 adult Floridians were surveyed via an online web-panel using an industry leading market research provider. The survey was fielded from July 2nd through July 10th 2022, and the results are reported with a 95% confidence level and a margin of error of +/- 4. Respondents were selected via stratified, quota sampling to ensure a representative sample. Balanced quotas for gender, age, race/ethnicity, education and party affiliation were determined based on data from the U.S. Census Bureau, Florida's Department of State, and Florida's Office of Economic and Demographic Research (EDR). Quotas were stratified by region of the state for geographical representativeness.
