

Bachelor of Science in Applied Science/Public Health

The goal of the Public Health concentration is to develop in a broad range of students an understanding and appreciation of the field of Public Health. Upon completion of the Public Health concentration coursework, a student will be able to articulate the role of public health in disease prevention and health promotion at the local, state, national and global level, describe public health concepts and issues, discuss and analyze current public health issues, describe career paths in public health, and develop an understanding of public health that can serve as a foundation for the pursuit of graduate public health degrees.
