

## Bachelor of Science in Biomedical Sciences

Biomedical Sciences is an area which focuses on chemistry and biology and how they relate to medicine. The objective of the program is to provide students with core knowledge of the natural sciences as well as advanced knowledge in areas of biomedical interest and to prepare students for graduate or professional schools and careers in areas such as medicine, dentistry, pharmacy, and physical therapy.

### Entry-Level Positions

[Biomedical Engineers](#)

[Clinical Research Coordinators](#)

[Medical and Laboratory Technicians](#)

[Pharmaceutical & Medical Salesperson](#)

### Positions with a Graduate Degree

[Animal Scientists](#)

[Biological Science Teachers, Postsecondary](#)

[Dentist](#)

[Family and General Practitioner](#)

[Medical Scientist](#)

[Pharmacist](#)

[Physical Therapist](#)

### Curriculum Information

[Biomedical Science Eight Semester Plan](#)

### Professional Organizations and Related Resources

[American Society for Clinical Pathology \(ASCP\)](#)

[The American Society for Clinical Laboratory Science \(ASCLS\)](#)

[American Institute of Biological Sciences](#)

[American Society for Microbiology](#)

[National Science Foundation](#)

[Careers/Professions for the Biology Graduate](#)

[Society for Integrative and Comparative Biology](#)

[American Society for Biochemistry and Molecular Biology](#)

[Explore Health Careers](#)
