Career Hub

Information and Updates for Faculty
Recent Changes to our Office

This past Summer, our office underwent a complete strategic alignment and planning process based on Florida HB 1261 requirements.

One result of our realignment was a restructuring of our instructional support services around a portfolio of workshop offerings that are based on a Career Literacy curriculum.

This workshop-based Career Literacy curriculum provides students with a sequenced set of workshops to help them develop their career readiness skills. Topics include (but are not limited to) resume development, interviewing, networking, career planning and employer engagement.

We have offerings several times a day throughout each week to make it easy for students to attend both in-person and virtual programming throughout the semester.
Career Hub Offerings Portfolio

Our Workshops are focused on specific topics, designed to help students build the necessary skills for lifelong career success.

Workshops are grouped by level and topic.

Levels include:
• Mastering the Basics
• Gaining Experience
• Engaging with Employers
• Exploring Grad School
• Launching Your Career

Please click below for our current Offerings Portfolio with Workshop topics and descriptions.

How to Partner with the Career Hub

We encourage Faculty to partner with our office by sending their students to our Workshops. If you provide a class roster, we will track student attendance and progress, and provide a summary report of that data.

For example, you could have your class register for a Virtual or In-person Workshop, based on your syllabus and instructional preferences.

This allows Faculty the flexibility to have their students attend multiple workshops throughout the academic years at times that are convenient for your students.
Faculty Contact for the Career Hub

Faculty point of contact is Wendy Dickinson, Ph.D. To partner with our Office, address email to Dr. Wendy Dickinson at email below. CareerServices@usf.edu
