

MASTER OF SCIENCE APPLIED BEHAVIOR ANALYSIS

UNIVERSITY of
SOUTH FLORIDA

College of Behavioral & Community Sciences
Child & Family Studies

WHAT WE DO?

The ABA master's program aims to produce scientist-practitioners in the field of behavior analysis. This is achieved through a combination of coursework, research, and fieldwork activities. Students who complete the program at USF can expect to receive top-notch training from highly motivated and productive faculty members. Additionally, they will benefit from individual mentoring in research, enabling them to develop diverse research interests in the science and practice of ABA.

AREAS OF RESEARCH

- Health, fitness, and sports
- Verbal behavior
- Community applications
- Assessment and treatment of problem behavior
- School based applications
- Translational research
- And much more!

WHY USF?

- Meet both fieldwork and coursework requirements for the BCBA certification prior to graduation
- Live in beautiful Tampa, Florida
- Full tuition scholarship opportunities
- ABAI accredited program
- Top Tier Education at one of the highest ranked public institutions in the US
- Compassionate faculty support from award winning and internationally renowned researchers
- Beta Chi Student-led Organization
- Become fluent in both research and practice
- Preparation for doctoral studies
- And much more!
