

I-HOPE

Interventions for Health-promotion
in Oncology and Obesity in Pediatrics

NOURISH-T+

Promoting Healthy Eating
and Exercise Behaviors

RESEARCH OPPORTUNITY

NEED: motivated students (bilingual) interested in developing research skills.

Welcome to the I-HOPE Lab

The I-HOPE Lab is recruiting students interested in working on a randomized clinical trial, NOURISH-T+. Students will work with pediatric cancer survivors learning to adopt healthy behaviors.

There is also the opportunity to receive course credit.

New to research? No problem!

We provide training. **All students, including First Year Undergrads, are encouraged to apply!**

What will you learn?

Students can learn to collect and enter data; transcribe sessions; contribute to coding and fidelity sub-projects; contribute to presentations and publications; and more. Students will work with families from diverse backgrounds as they complete each stage of the study.

Qualifications

- X 3.5+ GPA
- X "B" or higher in Research Methods
- X Work ~10 hours per week
- X Volunteer for at least 1 year
- X Join lab meetings on Tuesdays
- X Bilingual (Spanish/English) preferred

Benefits

- X Grad or med school applications
- X Resume/CV building
- X Letter of recommendation
- X Experience in clinic research
- X Job applications
