As our world grapples with the aftermath of the pandemic, it is imperative for researchers and educators to reassess and reshape the landscape of literacy education. This entails gaining a deeper understanding and acquiring techniques to address the challenging issues faced by both students and teachers in current literacy education. This webinar emphasizes the importance of literacy education and teacher preparation on a state, national, and international scale. It emphasizes four minoritized literacies, aiming to bring them to the forefront of the research landscape to provide resources to encourage and mobilize scholars to prioritize these knowledge bases. Furthermore, our discussion will encompass strategies for preparing teachers for a diverse student population. Panelists will delve deeply into their perspectives on literacy education and teacher preparation and provide implications for future research.

Meet the Speakers

Dr. Wenyu Guo

Assistant Professor
Literacy Studies
University of South Florida

Dr. Susan Bennett

Associate Professor
Early Childhood Education
University of South Florida

Dr. Julia López-Robertson

Professor
Teacher Education
University of South Carolina
