

**2015 – 2016 District Evaluations of USFSP Completers  
Employed in Florida Public Schools**

Of the 416 completers reviewed in the FLDOE report, 133 were not evaluated. Of those not evaluated, 88 were not employed in Florida public schools, and 24 were in public schools but not evaluated. Another 21 completers were employed but not in public schools. The following is a breakdown of the 283 evaluations:

<b>District Rating of Completer</b>	<b># of Completers</b>	<b>Percentage of Total Evaluated</b>
Highly Effective	86	30.4
Effective	176	62.2
Needs Improvement	4	1.4
Developing	16	5.6
Unsatisfactory	1	.4

A further look at completers not rated Highly Effective or Effective indicate eight were BXE candidates in the first year of teaching, six were in the second year of teaching (5 BXE, 1 EL), and seven were in the third year of teaching (6 BXE, 1 Reading).

Thus, 92.6% of USFSP completers evaluated were rated Highly Effective or Effective by Florida public school districts.
