Major Research Area Paper Presentation

CDMS – A Concurrent Database Management System

by

Mehrad Eslami

For the Ph.D. degree in Computer Science & Engineering

This research introduces a concurrent database management system in order to increase simultaneous query executions and outcome throughput. Parallelizing a system improves system performance by a fraction that depends on the substructure of the system. The allocation of a right access path depends on the system characteristics as well as a query optimizer for concurrent query processing are the main keys this research relies on.

Thursday, August 10th, 2017

10:00am

ENB 313

THE PUBLIC IS INVITED

Examining Committee

Yicheng Tu, Ph.D., Major Professor

Xinming Ou, Ph.D.

Sriram Chellappan, Ph.D.

Mingyang Li, Ph.D.

Ming Ji, Ph.D.

*Miguel Labrador, Ph.D.
Graduate Program Director
Computer Science and Engineering
College of Engineering*

*Sudeep Sarkar, Ph.D.
Department Chair
Computer Science and Engineering
College of Engineering*

Disability Accommodations:

*If you require a reasonable accommodation to participate, please contact the
Office of Diversity & Equal Opportunity at 813-974-4373 at least five (5) working days prior to the event.*
