

**Civil and Environmental Engineering Professor Maya Trotz Elected
to AEESP Board of Directors**

Maya A. Trotz, associate professor, civil and environmental engineering was elected, through a competitive national election of her academic and practitioner peers, to a three-year term on the Board of Directors of the Association of Environmental Engineering & Science Professors (AEESP).

Trotz has research and education interests that are situated at the nexus of geochemistry/water quality and global/community sustainability. Her interests are interdisciplinary, transdisciplinary, and applied, and seek to forge non-traditional university partnerships with local and international entities, especially those in the Caribbean. Dr. Trotz is the 2014 winner of the AEESP Award for Outstanding Contributions to environmental engineering and science education. She also served as the co-chair for the 2011 AEESP Education and Research Conference held in Tampa.

AEESP was founded in 1963 and has members in universities throughout the world. The association assists its members in improving education and research programs, encourages graduate education, and serves the profession by providing information to government agencies and the public, and provides direct benefits to its members.
