Dr. Salvatore D. Morgera will speak on:

A New and Safe Way of Treating Brain Issues

Abstract: The engineering, life sciences, and medical communities are now understanding the extraordinary complexity of neurological networks and are tackling neurological dysfunction using game-changing non-invasive methods for diagnosis and therapeutic treatment. See the impact of this paradigm on the millions afflicted with neurological dysfunctions, mental disorders, and traumatic brain and spinal cord injury. , Dr. Salvatore Morgera is Professor of Electrical and Biomedical Engineering at USF, a Fellow of the Institution of Electrical & Electronics Engineers, and a Fellow of the American Association for the Advancement of Science. He is also a Tau Beta Pi Eminent Engineer.

Dr. Morgera delivering the talk attended by over 100, including Physicians from the USF College of Medicine
