

Required courses for BSIE (Bachelor of Science in Industrial Engineering)

Prerequisite courses to be completed prior to department admission

<u>COURSE CODE</u>	<u>COURSE TITLE</u>	<u>PRE/ CO-REQUISITE</u>	<u>FALL</u>	<u>SPRING</u>	<u>SUMMER</u>
EGN 3443	Probability and Statistics for Engineers An introduction to the basic concepts of statistical analysis with special emphasis on engineering applications.	PR: MAC 2282	X	X	X
EGN 3615	Engineering Economics w/Social & Global Implications Presents basic economic models used to evaluate engineering activities and an understanding of the social and ethical implications of financial decisions in a multicultural environment through lectures, case studies and current readings.		X	X	X
EGN 4450	Introduction to Linear Systems An introduction to the basic concepts of systems of linear equations, matrix and matrix operations, vector operations and vector space.	PR: MAC 2282	X	X	X
EGN 1113	Intro to Design Graphics		X	X	X

Industrial Engineering - Core Courses

<u>COURSE CODE</u>	<u>COURSE TITLE & DESCRIPTION</u>	<u>PRE/ CO-REQUISITE</u>	<u>FALL</u>	<u>SPRING</u>	<u>SUMMER</u>
EIN 4621	Manufacturing Processes The study of basic manufacturing processes and precision assembly. CAD/ CAM including NC programming.	PR: EGN 1113	X		
ESI 4312	Deterministic Operations Research Basic techniques for modeling and optimizing deterministic systems with emphasis on linear programming and basic mixed integer programming. Compute solution of optimization problems. Applications to production, logistics, and service systems.	PR: EGN 4450, CR: ESI 2009	X		
EIN 4312C	Work Analysis Operation analysis and workspace design, work measurement, standard data, ergonomics, and labor costing	PR: EGN 3615 & EGN 3443	X		
ESI 2009	Intro Engineering Programming A problem based approach to describing programming concepts using Visual Basic for Applications and MS Excel.	PR: MAC 2281, CR: ESI 4312	X		
EIN 4333	Production Control Planning and control of production systems. Includes forecasting and inventory control models, scheduling and sequencing, MRP, CPM/PERT, and resource requirements.	PR: ESI 4312, EGN 3443			X
ESI 4221	Industrial Statistics Quality Control This course will present the theory and methods of quality monitoring including process capability, control charts, acceptance sampling, quality engineering, and quality design.	PR: EGN 3443			X
ESI 4313	Probabilistic Operations Research Probabilistic models in Operations Research. Discrete and continuous time processes, queuing models, inventory models, simulation models, Markovian decision process and decision analysis	PR: ESI 2009, EGN 3443			X
ESI 4620	Design of Industrial Info Systems Relational database model and structured query language, the use of design methodologies for developing functional and informational architectures for enterprise resource planning in production control and service systems, the implementation of user interfaces in forms and reports and web-enabled order fulfillment applications.	PR: ESI 2009, EGN 3443			X

Required courses for BSIE (Bachelor of Science in Industrial Engineering)

<u>COURSE CODE</u>	<u>COURSE TITLE & DESCRIPTION</u>	<u>PRE/ CO-REQUISITE</u>	<u>FALL</u>	<u>SPRING</u>	<u>SUMMER</u>
ESI 4606	Engineering Analytics I Evaluate a large database, reduce dimensionality, identify appropriate solution approaches, apply methods of supervised and unsupervised data mining, visualize data and outcomes, and assess the quality and usefulness of the developed models.	PR: ESI 4312, EGN 3443	X		
EIN 4364	Facilities Design and Cost Analysis Principles and techniques for the design, modification, cost analysis, and evaluation of service and industrial production facilities.	PR EIN 4312C, CR: EIN 4333, ESI 4221	X		
ESI 4244	Design of Experiments Activity forecasting models and control; design and use of inventory control models, both designs applicable to engineering analyses; analysis of variance and regression.	PR: EGN 3443	X		
ESI 4523	Systems Simulation Design and modification of industrial production and material handling facilities. Basic facilities design and analysis techniques, study of computer aided layout algorithms and study of warehousing operations.	PR: ESI 4313	X		
EIN 4601C	Automation and Robotics Introduction to the practices and concepts of automation as applied to material handling, inventory storage, material transfer, industrial processes and quality control.	PR: EIN 4621		X	
ESI 4607	Engineering Analytics II Data Exploration, data visualization, large-scale engineering system decomposition using ANOVA, multiple regression and LASSO, principal component and analysis and K-mean clustering for system reduction; predictive modeling using logistic regression and support vector machines to facilitate engineering decisions.	PR: ESI 4606		X	
EIN 4243C	Human Factors Design of man-machine systems by taking into consideration both human and machine capabilities and limitations.			X	
EIN 4891	Capstone Design Offers a focused team-based design experience incorporating appropriate engineering standards and multiple realistic constraints. Projects are proposed by industry and/or other partners and are completed within a defined development process.	PR: EIN 4364, CR: ESI 4523		X
