

#### THE GNSI MISSION

Provide actionable solutions to 21st century security challenges for decision makers at the local, state, national and global level, focused on the intersection of policy and technology.

GNSI will flourish at the nexus of these three strategic areas of focus, bringing together the best thinking of each, creating a unique and valuable extension to traditional think tanks.

## LOCAL | STATE | NATIONAL | GLOBAL

"Decisionmakers today are facing challenges they've never encountered before. They're not just looking for ideas, but also "Next steps." Not just "Here's what could go wrong," but also "Here's how to prepare for it." There's a real opportunity to fill a strategic gap in available resources for these leaders, making sure they have the best information and solutions available."

# **THE GNSI ADVANTAGE**

GNSI is well-situated to leverage the existing academic excellence of the University of South Florida, itself located in a dynamic, growing metropolitan area, to create a hub of strategic dialogue unlike any other facility in the world.

We will build upon USF's extensive R&D assets as a Preeminent Research University that ranks annually in the Top 10 for patents issued, globally recognized faculty and research expertise. Existing relationships with USCENTCOM and USSOCOM at MacDill Air Force Base, as well as existing partnerships with the Florida Center for Cyber Security and the Institute for Applied Engineering, will help us achieve prominence in the global and national security environment.
