

Label specimens with derivation date.

Unlabeled specimens or specimens stored beyond 30 days will be discarded.

Tissues should not be stored >12 hours in 10% neutral buffered formalin, but should be made into paraffin blocks or transferred to 70% ethanol and stored in your laboratory.

This cabinet is only a temporary holding area.

Please take samples to your lab or discard if there is no intent to use them for further study.

Please direct questions to Tissue Core Histology.
