**Note:** This form is to be used to record the use of every  $\mu\text{Ci}$  of activity removed from stock vial. Each time an aliquot is removed, an entry should be made indicating the balance of activity remaining. DO NOT account for decay. Remember to label samples/aliquots removed with R#. When balance of activity reaches zero and waste is ready for collection, a copy of form should be turned in to USF radiation safety office – MDC 35 (or fax to RSO at 974-7091).
