

WHAT TO CHECK WHEN SUBMITTING YOUR IMMUNIZATION DOCUMENTS

Measles, Mumps, and Rubella

- Proof of TWO MMR vaccines, given **after your first birthday**.
- The 2nd MMR vaccine must be given **at least 30 days after** the 1st MMR vaccine
- You can also submit proof of an IgG titer, completed within the past 5 years, to ensure immunity for Measles and Rubella.
- Must be quantitative lab report, showing results and reference ranges

NOTE: All screenings MUST have your **name, date of birth, and contact information of the provider/facility providing the services**

Tuberculosis

***Required for all students residing at an address outside of the U.S. at the time of application**

- Must be done within **6 months prior** to the 1st semester you physically attend classes
- PPD skin test must be read within **48-72 hours**, document must include the **date administered and the date read**. Results of 10MM or more requires a chest x-ray.
- PPD skin test: Measurement in **millimeters (MM)** needs to be reported, by using a single digit with no symbol or decimal (**see image to right**)
- OR Blood Test/Lab report for **QuantiFERON or T-Spot**

If you have a positive PPD skin test OR blood test, you must do the following:

- Submit a **Chest X-Ray** report and quantitative lab report, ensure you submit **only the report and not an image of the x-ray** **NOTE:** All screenings MUST have your **name, date of birth, and contact information of the provider/facility providing the service**

Hepatitis B

***Hepatitis B is recommended, you may decline by following the steps below OR provide proof**

- To decline the Hepatitis B vaccines, log onto OASIS, MyBullsPath, or check the box on the USF Medical History form
