      Karen Holbrook/Eddie Beauchamp
   b. USF Health/TGH Partnership Update
      Charly Lockwood

V. Adjournment
   Chair Mullis
USF Board of Trustees
June 6, 2019

Issue: USF Sarasota-Manatee Manatee County Land Transaction

Proposed action: Informational

Executive Summary:

The University of South Florida Sarasota-Manatee Campus is committed to enhancing the student experience on campus. On February 26, 2019, the Manatee County Commissioners unanimously approved the USFSM conceptual land plan for the use of the track of land between current USFSM property and the Sarasota Bay. Since this date, meetings have taken place between the Manatee County Staff and the USF Staff to determine the stipulations needed for this transaction.

The intent for this information item today is to provide an update on the status and outcomes of these meetings.

Financial Impact: TBD

Strategic Goal(s) Item Supports: Goal 4: Sound financial management to establish a strong and sustainable economic base in support of continued academic advancement

Workgroup Review Date: May 14, 2019 Strategic Initiatives Committee

Supporting Documentation Online (please circle): Yes No

USF System or Institution specific: USFSM

Prepared by: Eddie Beauchamp, Regional Vice Chancellor for Business and Finance
FEMA Flood Map
Consolidated Master Plan/FEMA Flood Map
Next Steps/Milestones

In Progress:
1. Metes and Bounds Property Survey performed by County
2. Written Restrictions from County
3. Verbal Restrictions include:
   • Appropriate Setbacks and Natural Buffers from Crosley Estate
   • Maintain Green Space along Bay Front
   • Architectural Consistency with Crosley Estate
   • Multipurpose Pedestrian Pathway
   • Decorative Fencing Along Property Line
Other Steps/Milestones

We Need:
1. Detailed Property Survey (topography, flood zones, vegetation, easements, restrictions, etc.)
2. Legal Description of Property
3. Environmental Survey (wetlands, wildlife, conservation areas, etc.)
4. Archeological Assessment (historically designated property)
5. Amendment to the Existing 2015 Campus Master Plan
6. Assessment of new development impacts (land use, traffic, transportation, parking, public infrastructure, emergency planning, etc.) by professional consultants
7. Update to Campus Development Agreement with Manatee County
8. BOT/BOG Approvals

National Healthcare Perspective: AMCs

Across all missions, Academic Medical Centers are facing new market pressures.

**Clinical Mission**
- Increased competition from community hospitals with high end capabilities threaten to carve AMCs from narrow networks
- Significant pressure from payors to demonstrate value – outcomes that justify higher costs
- Challenging payor mix (Medicaid and uninsured) and state efforts to reduce Medicaid reimbursement

**Research Mission**
- NIH success rates continue to erode
- Research shifting from individual investigator to multi-center focus
- Rising costs to support research infrastructure, including technology, space, and incremental staff
- Pockets of commercial grant growth, but less lucrative indirect coverage

**Educational Mission**
- Internal and external pressure to increase residents and fellow positions
- No new GME funding to support new positions
- Teaching model shifting to outpatient, affecting rotations and AMC resident “service” model
- Increased focus on student debt, constraining increases in tuition growth
Integration Matters Among the Top Schools & Hospitals

Among the top ranked US News & World Report Medical Schools and Hospitals, the majority have pursued an integrated model bolstering academics and clinical care.

Advantages to USF – Why We’re Doing This

There are specific benefits to the partnership that will provide stability to the University and enhance the operations of USF Health in the future.

- Supports greater investment in academics
  - Academic funding is linked to the growth of entire academic medical center, including hospital assets
  - Provides incremental funding opportunities as performance of the academic medical center improves

- Enhances ability to recruit
  - Aligns hospital and physician interests in recruiting, preventing the need to negotiate individual support agreements for new hires

- De-risks USF’s clinical enterprise
  - Reduces impact to USF of declines in state funding for Medicaid
  - Guards USF against managed care headwinds
Shared Vision and Guiding Principles
This past summer, leaders from USFH & TGH collaborated to establish a shared vision and guiding principles for an enhanced partnership.

**Shared Vision:**

For USFH and TGH to build upon their longstanding affiliation and become Florida’s leading AMC through a sustainable, collaborative and comprehensive partnership that mutually benefits each organization, across all missions including clinical, teaching, research and advocacy.

**Guiding Principles:**

|--------------------------|-------------------------------------|----------------------------|
Affiliation Overview

The affiliation will include a Joint Venture Medical Group governed by TGH and USF representatives along with 50/50 split JAC to guide overall strategy.
Partnership Economic Model

The economic model preserves the Dean’s Tax and historical practice plan margin by tying it to the clinical enterprise’s NPSR and operating margin.
Protecting USF in the Path Forward

The partnership discussions to date have had a thoughtful approach to ensuring that USF’s interests are protected.

1) Sovereign immunity remains
   • Proposed structure will protect sovereign immunity of USF physicians in their clinical practice

2) Bond payments secured
   • UMSA’s revenue will pay off any necessary bond obligations before transfer to NewCo

3) State assets not impaired
   • Assets will continue to be owned by the University with the management overseen by the partnership

4) Faculty remain employed by the University
   • Academics continue to be employed by USF, protecting the research mission of the University
