[Insert Grading Requirements information.]

GPA Requirements

[Insert GPA Requirements information.]

Residency Requirement

[Insert Residency Requirement information if applicable, or delete this core if not applicable.]

Other Requirements

[Insert Other Requirements information if applicable, or delete this core if not applicable.]

Research Opportunities

All undergraduate students in any degree program can participate in undergraduate research. There are a number of options to receive academic credit for a mentored research experience and to have the experience show on the official transcript. Students who wish to enroll in an undergraduate research course should consult with their academic advisor to understand how the credit will apply towards the degree requirements. If no credit is needed, students may be eligible to enroll in the 0-credit [IDS 2912](#), [IDS 4914](#) or [IDS 4910](#) courses. These courses will not impact degree credits or GPA but will show on an official transcript and document the experience. The [Office of Undergraduate Research](#) will assist students in understanding the various course options.
