

CON NELL NOTES

Your Name: S. Gonzalez

Conference Attended (name, location, date):		
NASPA Military Connected Symposium, Feb. 2019		
	Notes	Why relevant / how you will use
What I learned (may include new "hot topics and trends")	1. Andrew Sonn (George Washington University) shared tips for strategic planning and program review bases on their 360 review during a leadership change. His tips combine policy and research analysis as well as anecdotes and empirical evidence.	USF is going through a leadership change and we will probably all go through a program review
	2. Several institutions presented together to discuss and experiment where they all implemented the same programs and how/when/where these programs worked. Represented were a 2-year school, 4-year public and 4-year private. They discussed relationship building on campus across departments, budget, and populations as factors.	Hot topics were integration into LMS platforms, holds, and trainings, all of which we utilize at USF
	3. Charlie Wilson from PEW Charitable Trust discussed student indebtedness as it relates to veteran's experiences borrowing and repaying loans	Scholarship development and financial coaching
Tools and Technologies (include "what problem this solves")	Got your Six vs Greenzone for student veteran integration to campus	Need to compare and contrast
	VA Vital	Partnership with VA healthcare
Reflection, key takeaways, and next steps on campus:		
Individual and office level program review, what can our current technologies do for us, how are we reducing borrowing
